FOREWORD

The 1970 SUMMARY OF FINANCIAL REPORTS OF MUNICIPALITIES is the authoritative source of municipal finance data in Ontario.

The 1970 SUMMARY is essentially similar to the format of the two previous editions. With three years data now available, users will be able to start observing trends.

While the format is by and large that used earlier, the publishing of the SUMMARY has been computerized. An important secondary product of this new system will be the retrieval and manipulation of the data. With this system now created, future publications can be prepared much more readily.

I thank the many municipal treasurers and auditors whose efforts make the SUMMARY possible. I also ask that increased efforts be made by officials responsible so that reports be filed correctly and promptly. This will enable all of us to achieve maximum benefits from the new production methods.

February 1, 1972

Minister of Municipal Affairs

INTRODUCTION

The 1970 SUMMARY OF FINANCIAL REPORTS OF MUNICIPALITIES presents an accurate and meaningful review of the financial operation of Ontario municipalities. This first volume, the contents of which are indicated on the preceding Title Page, presents the Commentary and full Summary. The second one contains a brief introduction and Summary, both limited to the data in it.

The reporting format substantially repeats that adopted for 1968 and 1969 data. Accordingly the reader is able to further extend the numerous comparisons available for the first time with the previous issue.

In the pursuit of more realistic information, certain modifications in reporting procedures and summarization techniques have been introduced. The following comments concern changes, from last year's format, to data in this volume. (The Introduction in Volume 2 should also be read before reviewing the Summaries and using detailed data.)

ANALYSES OF POPULATION, HOUSEHOLDS AND ASSESSMENT

An 'Analyses of Population Ages' showing the percentages of each municipality's population within four groupings—'4 Years and Under', '5-19 Years', '20-65 Years' and '66 Years and Over' has been introduced. The last two categories have been slightly altered from the '20-64 Years' and '65 Years and Over' used previously. The impact of this change, reflecting a revision in Assessment Act Regulations, is not significant as seen in the Commentary.

It is important to note the definitions of 'Population' and 'Households' as discussed in the Commentary. Please also bear in mind that changes in 1971 to the Assessment Act do not have any bearing on the data herein.

ANALYSES OF TAX ROLL

In 1970 the Province permitted local municipalities to start taxing university property at the rate of \$25 per annum, per full-time student. (The impact on universities of the removal of the exemption on their property was fully offset by increased grants by the Province.) This new source of municipal revenue is included under 'Special Charges', in both the 'Analyses Of Tax Roll' and the 'Taxation' reconciliation within the 'Statement Of Revenue'.

The Province also initiated two additional programs in its plan to further diminish the burden of property taxation:

- (a) The Residential Property Tax Reduction-Supplementary Tax Rebates to Needy Pensioners—allowing for reductions, over and above that available under the main program, of up to \$100 per household in the case of qualifying applicants.
- (b) The Farmers Tax Reduction Program—providing for reimbursement of 25% of property taxes paid by qualifying farmers.

These program payments, totaling \$30.5 million, were made directly to recipients (in contrast to payments under the main Residential Property Tax Reduction Program which are received by each local municipality and then applied, as reductions to the taxes, against qualifying households). Accordingly they do not stream through the financial reports of the municipalities and as such do not appear in either the 'Analyses Of Tax Roll' or the 'Statements Of Revenue'. However, the impact of these new programs is allowed for in the Commentary.

STATEMENTS OF REVENUE

The Summary item 'Unconditional and Regional Municipal' grants, formerly 'Unconditional', represents the redirection of part of the funds, formerly entirely payable under the Municipal Unconditional Grants Act, to regional municipalities under the operations of the Regional Municipal Grants Act enacted in 1970.

STATEMENTS OF EXPENDITURE

No changes to the previous issue format have occurred. It will be noted that the Commentary comments on the relative importance of those expenditure items, principally debt charges, which, starting with 1968 data, have been functionalized within General Municipal Activities.

OTHER PERTINENT COMMENTS:

- (a) The Regional Municipality of Niagara, which became operative January 1, 1970, supplies and distributes water, provides sewage works, a regional road system, police protection (effective January 1, 1971), health and welfare services, homes for the aged, hospitals and regional planning. The regional municipality is the sole issuer of debentures within the area.

The results of the first year's operations within the Niagara Area appear on pages 13-18 inclusively, in both Volumes. The consolidation of its affairs are patterned on the format used for the Ottawa-Carleton Area. Thus the levy paid to the Regional Municipality is to be seen within the 'Analyses Of Tax Roll', and, the revenue from such levy, and the corresponding expenditure are boxed for ease of identification in those respective statements.

- (b) The municipality of Metropolitan Toronto, the Regional Municipalities of Ottawa-Carleton and Niagara each represent, by definition, integral operating entities comprising an upper-tier and respective area municipalities. Accordingly separate consolidations appear for each area, following below the data for area municipalities.

Staff resources do not permit consolidations of each county and its supporting municipalities. Accordingly, counties, by definition being non-comparable with local municipalities, are presented together as a group.

TABLE VII (Page XXXV) presents a consolidation of current revenue and expenditure of upper and lower tier operations. Certain items have been removed, as per the footnotes to avoid over-stating results.

- (c) Seven small municipalities did not file in time for publication. Their omission is not statistically significant.

The absolute data, upon which Plates are based, are invariably contained in the Tables which immediately follow the Commentary.

Annual reports of municipalities are being increasingly scrutinized to ensure valid comparisons. The few cases where comparisons are not possible have been footnoted. Also the creation of the Regional Municipality of Niagara has required certain revisions to prior year data as indicated herein.

1970 HIGHLIGHTS

1970 population exceeds 7,215,000 persons. The latest increases, 142,000 persons or 2.0%, are below those of the previous year, 170,000 persons (2.4%), the largest of the preceding decade.

1970 taxation revenue, \$1,459.0 million rose 10.5% versus 12.0% the year earlier, with the main Tax Reduction Program allowed for in each case. The new \$30.5 million tax diminution programs, discussed in the Introduction, in fact limited the effective 1970 increase to 8.5%.

Provincial grants paid to municipalities and school boards equalled 97.1% of 1970 taxation revenue. Again allowing for the new 1970 programs, the latest year's figure exceeds 99.2%. This compares with 94.2% in 1969.

1970 current fund revenues of all reporting municipalities were \$2,069.7 million, up 12.4%. The increase in such revenues was slightly greater than the rise in expenditures. Consequently an aggregate \$5.5 million surplus on current operations resulted.

Contributions to education, which came from taxation, accounted for 40.4% of local municipalities' total revenue. This is to be compared with 41.6% in 1969.

1970 Capital expenditures of all reporting municipalities were \$340.1 million, up 7.0%. A net \$121.6 million or 36% of such expenditures still needed to be permanently financed at year end by reporting municipalities. This compares with \$148.8 million or 47% of expenditures the year earlier.

Year end 1970 taxes receivable were \$132.2 million (before deducting \$9.6 million allowance for uncollectable taxes) representing 9.0% of the 1970 tax rolls. Taxes receivable were \$109.5 million the year-end previous.

Long term debt associated with the activities of local municipalities and their enterprises was \$1,927.6 million at year end. The net increase in this figure was \$98.2 million or 5.4% during 1970.

1. Population

Ontario contains some 11.7% of Canada's area, 35% of the country's population, 37% of its workforce and about 40% of its Gross National Product. Most of Ontario's people live and work around the western end of Lake Ontario, along the 100 miles of lakeshore stretching from Oshawa to the Niagara Peninsula. This population belt is about 25 miles deep. The province's very important primary industries are located well to the north of this concentration of population.

PLATE 'A': Top half, compares trends in Ontario's population versus that of Canada as a whole, and Canada excluding Ontario, over the past decade. Since 1963, Ontario's population has exhibited above average growth than for the country as a whole. The **Population** of a municipality, as used in this publication (except where noted) means **the total population permanently residing in the municipality at the time of the 1970 assessment—less those resident in institutions, defence establishments and Indian reserves.** Assessors are required, by statute, to take an annual census of the population as part of their duties. It should be remembered that the definition refers only to municipally organized areas. Nevertheless, some 95% of the total estimated population of Ontario is found in municipalities.

TABLE 1 ONTARIO POPULATION 1960-1970, (Page XXIII) shows a population of 7,215,514 for 1970. (TABLE I also shows population for the province, estimated annually by Statistics Canada. This source's figure, at June 1, 1970 was 7,637,000.) PLATE 'A', bottom half, indicates the rate of population growth in 1970 (2.0%) was lower than that of 1969 (2.4%).

PLATE 'A', bottom half, also compares trends in population within larger Ontario municipalities versus that in remaining municipalities. It is to be seen that larger municipalities have collectively exhibited a higher rate of growth in all but one year (1967) during the decade, indicating a con-

tinuing trend towards urbanization. The SUMMARY (Page XXVI) shows 4,616,799 persons, or 64.0% of the total, reside within these larger municipalities. In PLATE 'A' adjustments have been made to allow for the creation of regional municipalities. Adjustments for further changes in status would further widen the divergence in growth patterns.

Plate 'A'

POPULATION TRENDS 1960-1970
CANADA

Population (millions)

ONTARIO MUNICIPALITIES

Population (millions)

Annual population increases - %

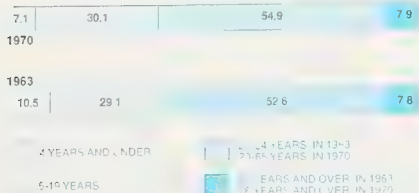

Annual changes in population - %

PLATE 'B' shows the drop in the relative importance of the youngest age group in the population, i.e. those '4 years and under', from 10.5% in 1963 to 7.1% in 1970. This trend continued in 1970 as the year earlier figure was 7.4%

PLATE 'B'

ANALYSIS OF POPULATION (%) BY MAIN AGE GROUPS

Adjusting for the switch in 1970, the two senior age groups become 54.2% and 8.6% respectively. These adjusted figures are comparable with 1969 data.

TABLE II ANALYSIS OF POPULATION BY MAIN AGE GROUPS (Page XXIII) indicates that this youngest group has actually dropped in absolute terms as well, from 596,000 to only 515,000, or, by some 81,000 during the period. The '5-19 years' group has increased by 528,000 persons, while all others, i.e. those '20 years or more' by 1,067,000 persons.

The age analysis data for each municipal group in the SUMMARY (Page XXVI) are based on medians (i.e. the average of position). However the data for 'Total Local Municipalities' in the SUMMARY as well as that for individual municipalities represents the average (i.e. the arithmetic mean).

The Ontario Statistical Review of 1970, published in June, 1971 by the Department of Treasury and Economics, describes this trend towards a more aged population using other pertinent indicators. The Ontario birth rate fell consistently from 26.2 persons per thousand in 1958 to 17.4 in 1968. A slight recovery to the 17.7 persons level in 1970 is noted. During this period the death rate has also fallen, from the 8.4 persons per thousand rate in 1958 to a 7.5 rate in 1970, the lowest rate on record. Accordingly the 'Natural Increase' factor (births less deaths) has dropped from the 17.8 level in 1958-1960 to about the 10.0 level in 1968-1970.

In absolute terms the 'Natural Increase' has dropped from an average 106,100 persons to an average 74,600 in the three years ending 1970. Immigration to Ontario, on the other hand, has shown just the opposite trend. The comparable averages are 58,400 persons rising to 87,800. (Both average immigration figures are likely higher i.e. to offset the unknown level of emigration).

Accordingly, immigration has become the prime contributor to population growth in Ontario. Moreover analyses of immigration figures indicate a high working age component. Ontario's population is increasing relatively quickly and becoming more urbanized. Further, its age distribution is changing. These fundamental trends will continue to alter the scope and volume of public services and the priorities attached to them.

2. Households

A household is defined, by The Assessment Act and The Residential Property Tax Reduction Act, as a **single family dwelling unit—or a portion of a building which is a domestic establishment—consisting of two or more rooms in which the occupants usually eat, sleep and prepare meals.**

PLATE C

ANALYSIS OF HOUSEHOLDS

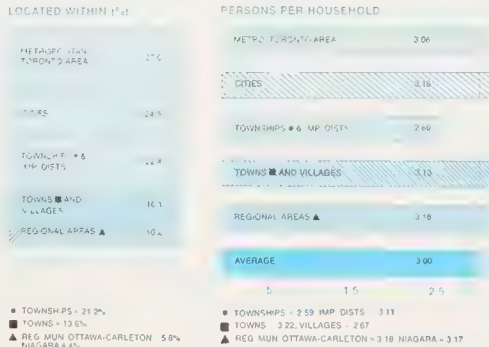

PLATE 'C', left portion, indicates the larger municipalities, as referred to above, account for 61.5% of the total 2,399,635 households. TABLE III 1970 HOUSEHOLDS, (Page XXIII) shows the number in each type of municipality

The number of households reported rose by 7.3% versus the 2.0% increase in population. An inspection of the increase in households indicates cities showed an increase close to the average, metropolitan and regional areas together a rise of 9% and smaller municipalities 6.8%.

Given the disparity between relative increases in population and households, it follows that there were an average 3.00 persons per household in 1970 versus 3.16 in 1969. The factors in PLATE 'C', right portion, were lower than those of the year earlier in all cases. The exception was improvement districts, the factor for which was very slightly higher.

Households, as per the Residential Property Tax Reduction Program, include qualifying seasonal residences. On the other hand population is reported exclusive of seasonal persons. Thus in recreation areas, the 'Persons Per Household' factor can be biased downward.

3. Assessment

To present assessment information in a meaningful way it is necessary to present three sets of figures:

- 'Assessment used for 1970 Taxes' is that upon which taxes have been imposed in 1970. In some cases municipalities collect school taxes for areas outside their jurisdiction. In such cases, this assessment is included and the amount noted.
- 'Provincial Equalized Taxable Assessment' is needed because assessment has been taken at varying percentages of market value. The Department of Municipal Affairs has accordingly established a system of equalization factors. These factors, when applied to taxable assessment, are designed to show the total assessment of the municipality had it been assessed at current market value. This device enables more meaningful comparisons to be made between municipalities.
- 'Analysis of Assessment taken in 1969 for 1970 taxes as per the Return of Assessment' is an analysis of assessment by various classes of property within a municipality. There are minor discrepancies between the total assessment as per the Return of Assessment, and that of 'Assessment used for 1970 taxes'. The reason is that the figures included under the Return are based on information provided by Assessors immediately after the closing of the assessment roll. 'Return' figures are subsequently adjusted, as a result of appeals etc., prior to the striking of mill rates.

TABLE IV 1970 PROVINCIAL EQUALIZED TAXABLE ASSESSMENT (Page XXIII) indicates equalized assessment of \$64.6 billion, up 11.2% over the year earlier figure of \$56.8 billion.

Changes in annual levels of equalized assessment are the product of increases, not only in the inventory of assessable property, due to economic development, but variations in market values reflecting demand and inflationary pressures, as well.

PLATE D

ANALYSIS OF PROVINCIAL EQUALIZED TAXABLE ASSESSMENT

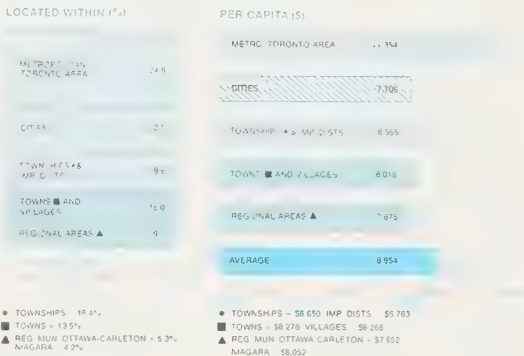

PLATE 'D' shows the larger municipalities accounted for 66.5% of equalized assessment (versus 64.0% of population and 61.5% of households). The average equalized assessment per capita of \$8,954 is significantly increased by the concentration of such assessment within the Metropolitan Toronto Area. Excluding this area, the average becomes \$8,041 per capita, a more descriptive figure. When calculating assessment ratios (using population or households), care should be taken in selecting comparable municipalities.

ANALYSES OF TAX ROLL

PLATE 'E' reconciles local taxation in Ontario in 1970 by the 'Purposes' and 'Payers' of such taxation. It should be noted that the data below excludes tax diminution payments in the total amount of \$30.5 million in 1970. Such payments were discussed above in the Introduction.

In terms of PLATE 'E', the benefit of such payments would attach to all eligible Realty Residential and Farm 'Payers' of Taxation. (The same principle applies to the \$139.8 million paid under the Residential Property Tax Reduction Program.)

PLATE 'E'

ANALYSIS OF 1970 TAXATION

\$ MILLIONS

BUSINESS	184.2
SPECIAL CHARGES	35.4

THE PAYERS OF TAXATION

54.1% 30.9% 12.6% 2.4%

'Purposes of Taxation' comprises General Taxation and Levies For School Boards.

(1) General Taxation—the levy applied to provide funds to meet the costs of general municipal services: It includes the MUNICIPAL levy (including special area rates), the COUNTY levy and SPECIAL CHARGES.

The county levy is not applied to cities or separated towns, nor does such a levy apply to municipalities in the northern districts. As noted earlier in the Introduction, the upper-tier metropolitan or regional entities levy on constituent municipalities.

Special Charges are principally charges for local improvements to specific taxpayers; where a municipality levies sewer rates and drainage charges, they are also included;

Miscellaneous Charges are items placed on the Tax Roll for collection purposes. They include such items as utility arrears and fees for agricultural organizations. Miscellaneous Charges totalling some \$6.0 million have been added with Special Charges in arriving at the Gross Tax Roll (Before Adjustments), discussed below

(2) **Levies for SCHOOL BOARDS:**

- Levies for secondary school purposes which are imposed on the same tax payers as general taxation.
- Levies for public school purposes and levies for separate school purposes which are imposed on taxpayers according to the school system supported.

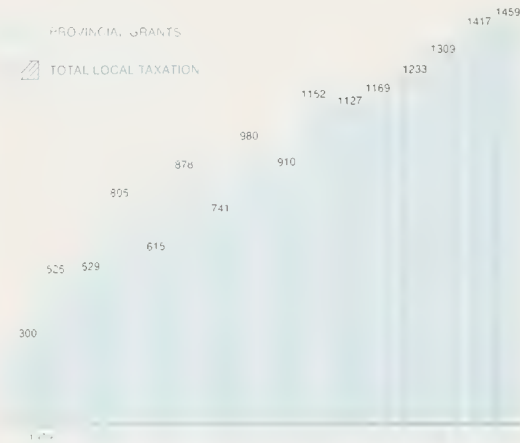

The items above produced a 'Gross Tax Roll (Before Adjustments)' of \$1,612.4 million in 1970. This figure—less the three items below—resulted in Total Taxation of \$1,459.0 million. In the order of their appearance in PLATE 'E', these three items are

- (1) **Residential Property Tax Reduction Program:** introduced in 1968 and continued since. This program embodies certain key elements which should be noted. The program reduces the tax burdens paid by households. The reduction is shown on individual tax bills as a decrease in the amount of total taxes to be paid. However, for the purposes of financial reporting, (See Statements of Revenue), program payments are treated as a municipal grant from the province and taxation is presented on a "net" basis.
- (2) **Adjustments:** are the result of calculations made to meet provisions for minimum tax levies, and to meet provisions for maximum taxation on certain specialized properties. These items, which invariably involve relatively small amounts of money, on balance reduced the Tax Roll by \$7.6 million in 1970. 'Taxes Written Off' and 'Discounts Allowed' are not reported under adjustments but on the 'Statement of Expenditure'.
- (3) **Miscellaneous charges:** must also be deducted from the Tax Roll in arriving at the Total Taxation figure of \$1,459.0 million.

PLATE 'F' relates Provincial Grants to Total Taxation. Grants play a key role in enabling municipalities to provide levels and scopes of services beyond those possible from local taxation. It can be seen that grants have risen from \$300 million in 1959 to \$1,417 million in 1970, nearly a five fold increase.

PLATE 'F'

PROVINCIAL GRANTS IN RELATION
TO TOTAL LOCAL TAXATION—\$ MILLIONS

NOTE: 1970 Data does not include new tax diminution program payments, total \$30.5 millions, paid directly to eligible local tax payers.

As the rate of increase in grants has been noticeably greater than that of Taxation, grants as a percent of local Taxation have risen from 57.1% in 1959 to 97.1% in 1970.

The nature and amount of such grants in 1968 through 1970 follow in PLATE 'G' below.

The data have been laid out in such a fashion as to show the net burden on local taxpayers. This net burden has risen very modestly over the 1965-1970 period from 3.91% to 4.08% of Gross Provincial Product. It is to be noticed the 'Residential and Farm Taxes' burden dropped slightly in 1970.

PLATE 'G'

PROVINCIAL GRANTS IN RELATION TO LOCAL TAXATION

	1968 Millions	1969 Millions	1970 ■ Millions
GRANTS *			
A TO LOCAL MUNICIPALITIES			
Operating Grants	\$ 287.8	\$ 311.9	\$
Payments in Lieu of Taxes	13.0	15.5	
Capital grants	61.1	67.1	
	<u>361.9</u>	<u>394.5</u>	
B TO COUNTIES Operating and Capital grants	51.1	45.8	54.8
C TO SCHOOL BOARDS	714.0	792.9	
TOTAL GRANTS**	<u>\$1,127.0</u>	<u>\$1,233.2</u>	
TOTAL LOCAL TAXATION	\$1,169.4	\$1,309.4	
TOTAL GRANTS AS A PERCENTAGE OF TOTAL LOCAL TAXATION	96.5%	94.2%	97.1%

*Grants reported by local municipalities in the calendar years; education grants paid on a fiscal year basis ending March 31, as reported by the Department of Education

**Total Grants exclude transfers to other entities such as local boards, Conservation Authorities, etc.

■ 1970 data excludes payments (under the new tax diminution programs previously discussed), total of \$30.5 millions paid directly to eligible local taxpayers

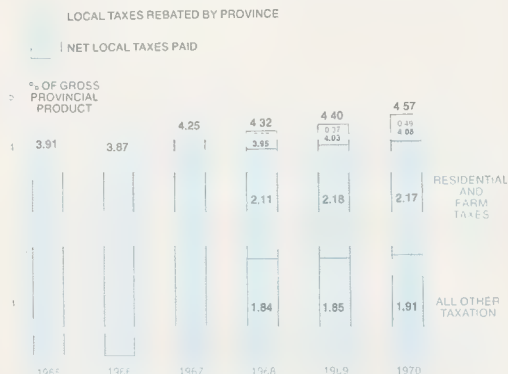

The sizeable amounts of aid to municipalities and school boards itemized in Plate 'G' should not be construed as the total amount of transfers supporting services at the local level. Thus for example, in addition to the \$30.5 million tax diminution programs cited above, transfers to Conservation Authorities and hospital boards, to cite just two exclusions, would add a further minimum \$29 million to the 1970 figure.

A key role is played by provincial grants in containing the rise in tax levels, in the face of ever-increasing demands for service at the local level. This can be seen in PLATE 'H', the purpose of which is to graphically relate local taxation to some fundamental measure of wealth or ability to pay. The measure chosen is Gross Provincial Product i.e. the value of goods and services produced within Ontario.

PLATE 'H'

TOTAL LOCAL TAXATION RELATIVE TO GROSS PROVINCIAL PRODUCT

Calendar years 1965-1970

NOTE: 1. provincial transfers to local authorities and Farm Taxes, and
All other taxes are 1965-1969 figures before 1969.

While the above type of discussion is enlightening, it understates the case in that it does not allow for the greatly increased demand, both volume-wise and quality-wise, for services at the local level.

In response to this demand, total per capita current expenditures, including education contributions have risen nearly three fold since 1949 (after allowing for inflation since that date). Yet taxation's claim on disposable income has less than doubled.

PLATE 'J' summarizes the main components of revenue and expenditure for local municipalities in 1969 and 1970. These main components, expressed as percentages of revenue, exhibit minor changes in 1970 versus the year earlier. However, as total revenues increased somewhat more than expenditures, 12.6% versus 12.2%, a modest net surplus of \$5.4 million resulted.

A more involved inspection of 1970 revenue and expenditure items is best done in the format below which recognizes the variations possible within the main types of municipalities.

PLATE 'J'

Excludes \$16.0 millions in payments under the Farmers Tax Rebate Program

1. Revenue

TABLE V COMPARISONS OF ASSESSMENT TAXATION FOR THE YEAR 1970 WITHIN MAIN MUNICIPAL GROUPS (Page XXIV) shows the contributions by various payers of Total Taxation in each municipal group. The 'Residential and Farm' taxpayers contributed 54.1% of Total Taxation, little changed from 1969. This factor varied from 49.5% in the Metropolitan Toronto Area upwards to 72.5% for Townships and Improvement Districts.

(The analyses of 1969 Assessment Used for 1970 Taxation show the portions of the total of such assessment within each main municipal group allocated to main 'payer' groups. Comparisons of such percentage allocations with respective tax contributions are not suggested, because of distorting pressures such as the split mill rate).

The minor changes in TABLE V ratios 1970 versus 1969 are in part caused by the creation of the Regional Municipality of Niagara.

PLATE 'K', top half, shows the relative importance of the three main components of revenue within municipalities. In view of the increased role of grants, as shown in PLATE 'G', contributions from other Governments accounted for 22.2% of total revenue, versus 20.8% in 1969. With 'Other Revenue' virtually unchanged at 5.6%, 'Taxation' accordingly dropped to 72.2% of revenue. (N.B. These revenue figures exclude grants to School Boards, Conservation Authorities etc.).

PLATE 'K', bottom half, shows the main components of revenue on a per capita basis. Using the SUMMARY, it is calculated that per capita taxation was an average \$280 in 1970, up 9.8% over the 1969 figure. The rate of increase in the per capita figure varied between 7.2% in Townships and Improvement Districts upwards through 11.7% in Ottawa-Carleton.

2. Expenditure

PLATE 'L', top half, relates the main types of expenditures to total revenues. In the larger municipalities, General Municipal Expenditures account for 59.9% of total revenue, or \$190 per capita. This compares with figures of 50.1% and \$104 per capita in the others. In this last set of calculations, 'Contributions to County' have been included. (Additional comments on General Municipal Expenditures appear following the conclusion of the discussion of PLATE 'L').

Education Contributions as a portion of total revenue for all municipalities declined to 40.5% from the previous level of 41.6%, due to increased provincial grants. For larger municipalities it is calculated that such contributions produced 40.5% or \$129 per capita bench-marks. These compare with 40.7% and \$85 in the other municipalities. In both groups, contributions for elementary school purposes (both Public and Separate) predominated—23.7% or \$75 per capita in larger municipalities, versus 21.9% or \$46 per capita in others. The relative importance of secondary school contributions dropped in both larger municipalities, from 18.3% to 16.8%, and, in smaller municipalities, from 20.1% to 18.8%.

'General Municipal Expenditures' accounted for 56.8% of all local municipalities' revenues, versus 55.5% in 1969. As expected, from our comments on education contributions, the increase in the prominence of general municipal expenditures was seen to apply in all municipal groups.

TABLE VI 1970 EXPENDITURE PATTERNS OF MAIN MUNICIPAL GROUPS (Page XXIV) analyzes the portions of total expenditure comprised by each sub-function for each municipal group. Also the average for all municipalities in 1970 is compared with 1969 data. In using this table, the impact of increased 'Social and Family Services' expenditures (discussed below) must be borne in mind.

The analysis of General Municipal Activities, in PLATE 'J' shows little change in the relative composition of expenditures in 1970 versus 1969, the notable exception being 'Social and Family Services' which rose from 5.5% to 7.0%. This stems from an increase of \$43.2 million, or 44.3%, for this function. Within this category, 'General Welfare Assistance' payments rose by \$30.9 million. However, municipalities bear only 20% thereof. Also within this category are services to 'Aged Persons' which rose \$9.1 million, and lastly expenditures for 'Children and Day Nurseries', up \$3.3 million.

'Public Works', the largest function, showed the next biggest increase, \$34.2 million (13.4%) versus \$12.8 million (5.4%) in 1969. The sizeable increase in the 1970 dollar outlay was fairly proportionately spread throughout the sub-functions.

'Protection to Persons and Property', outlays rose \$34.0 million. This function, the second largest area of municipal expenditure, continued to exhibit a rate of growth in the range of 16% per annum. 'Recreation and Community Services', continued to become increasingly important, with outlays of some \$117 million versus \$100 million in 1969.

The remaining six functions collectively accounted for only \$22.4 of the total \$150.6 million increase in 1970. The slight decrease in the 'General Government' function appears to be attributable to improved reporting, whereby expenditures, previously reported under this function, are now being more properly functionalized elsewhere.

Starting in 1968, charges for net long term liabilities, revenue fund contributions (for capital expenditures, to reserve funds, and reserves) have been allocated to general municipal expenditure functions. An analysis of such allocations indicates that they have decreased in importance, relative to total municipal expenditures in recent years, (from 25.0% in 1968 to 22.1% in 1970). The recent sizeable increase in 'Social and Family Services' outlays have accounted for half the decrease. The next most important reason for the decrease could well be increased contracting out of certain functions to third parties, rather than the municipality providing same directly. This thought is elaborated upon in the Analysis of Capital Expenditures (See page XVIII).

The 1970 analysis of allocations shows more than half of the total dollars allocated were accounted for by the capital intensive 'Public Works' and 'Sanitation and Waste Removal' functions. Thus 40.6% of expenditures in each case was accounted for by such items 'Community Planning and Development' at 34.4% and 'Conservation of Health' at 25.3% also had important elements

Municipalities, other than counties, collectively produced a \$5.4 surplus on current fund operations. This is to be compared with \$1.3 million in 1969. This is largely due to the surpluses reported within the Metropolitan Toronto Area and by cities as a group. Analyses in this area of municipal finance should be prefixed with the thought that often a deficiency is planned so as to reduce an accumulated surplus.

TABLE VII SUMMARY STATEMENT OF REVENUE AND EXPENDITURE—ONTARIO MUNICIPALITIES (Page XXV) shows results for both local and county municipalities combined. This Table is helpful for those readers wishing to see an aggregate picture, with a reasonable amount of detail, of annual revenue and expenditure levels for all municipalities.

The 1970 surplus, as per TABLE VII, is stated to be \$5,506,433. This is some \$93,485 less than the sum of surpluses for all municipalities shown in the SUMMARY (See page XXXI). This differential results from the principles employed in the preparation of TABLE VII. The 1969 surplus of \$254,691 is to be compared with a deficit of \$318,499 in the year earlier final SUMMARY.

In view of the comments already made in respect of local municipalities and the separate review of counties' operations (See Page XXI), no further discussion of the Table is needed.

CAPITAL FUND OPERATIONS

PLATE 'N' summarizes capital fund operations of local municipalities in both 1969 and 1970. Before a meaningful discussion of such operations can be presented, the impact of the new school boards financing techniques must be appreciated.

In 1968 municipalities received some \$150 million in loans from The Ontario Education Capital Aid Corporation ('O.E.C.A.C.'). Municipalities borrowed the large majority of this money, \$143.6 million, on behalf of local school boards. (Municipalities borrowed exclusively from 'O.E.C.A.C.' for school purposes). In 1969, with the creation of the new school boards empowered to borrow directly from O.E.C.A.C., the role of municipalities in such financing started diminishing. Thus such activity in 1969 was \$73.9 million, with a further drop to the \$50 million vicinity noted in 1970. This latter figure was nearly fully accounted for within the Metropolitan Toronto Area. (For further background comments the reader is referred to Volume 2 Page III).

PLATE 'M'

CAPITAL FUND OPERATIONS EXCLUDING O.E.C.A.C. FINANCING FOR SCHOOLS (\$ MILLION)

	1968		1969		1970

	<u>366.6</u>	<u>100.0</u>	<u>352.4</u>	<u>100.0</u>	<u>392.1</u>	<u>100.0</u>
APPLICATIONS						
Capital Expenditures	309.5	84.5	296.0	84.0	317.0	80.4
Transfers	47.1	12.8	51.5	14.6	46.0	11.7
Other	10.0	2.7	4.9	1.4	—	—
Decrease in Unfinanced Capital Outlay during the year	—	—	—	—	29.1	7.4

PLATE 'M' excludes municipalities' involvement in financings on behalf of school boards. Thus it shows capital fund operations in recent years pertaining to the provision on municipal services.

Amongst the various 'Sources' used to finance these operations, the increased role of long term liabilities is noted. However the 1970 figure of \$178.1 million represents the proceeds actually received on all such transactions. Before 1970, the par value of the issues were reported (with any discount shown within 'Other', under Applications). With this change, 1970 long term financing accounted for 45.4% of all sources. Without this change the ratio would have been somewhere between 44.0% and 44.5%.

Sales to the public, as reported by municipalities, amounted to \$150.8 million. One analysis of municipal borrowing from the 'public' sector in Canada, in 1970, suggests Ontario municipalities accounted for \$122.9 million, or 24.1% of a total \$510.0 million.

In 1970 the Municipality of Metropolitan Toronto received \$51.3 million, and the Regional Municipality of Ottawa-Carleton \$22.1 million from issues to the public. Amongst the 10 largest cities, 5 accounted for \$31.3 million in borrowings from the public.

Contributions from other governments provided \$98.5 million, with 81.0% of this amount coming from the Province. More than \$63 million of Provincial contributions were for roads.

Total		\$426.3	100.0%	\$446.1			\$426.3	100.0%	\$446.1	100.0%	

All other sources provided over \$115.5 million versus \$101.0 million in 1969, and increased in their relative importance. 'Contributions from the Revenue Fund' accounted for \$9.1 million of the increase. It is to be noted that municipalities' use of such financing continued to increase in importance, accounting for 16.1% of 1970 sources versus 13.4% in 1968.

In terms of PLATE 'M', total 'Sources' were up nearly \$40 million in 1970 versus 1969. However, one should also note the change in the mix of 'Applications' in the latter year. In summary, \$50.1 million was used to (a) decrease the amount of capital outlay not permanently financed by \$29.1 million, and (b) provide for an increase of \$21 million in the 1970 level of capital expenditures. Let us look at each of these main applications.

At the start of 1970, the deficit position on capital fund operations for all municipal-

ities was \$152.1 million. The sources discussed above, were invariably used to convert a portion of such obligations from a short to a longer term financing basis. The \$29.1 million so converted was spread throughout both the larger and smaller municipalities. Understandably, the one exception was The Regional Municipality of Niagara which, in its first year of operation, experienced a modest rise in its 'Unfinanced Capital Outlay' from \$6.0 million to \$11.6 million.

Capital expenditures of \$317.0 million were \$21 million or 7.1% higher than in 1969. However, the latest figure was not materially above the 1968 figure of \$310 million. In 1968, capital expenditures represented some 35% of current outlays for general municipal activities. In 1969 this figure was slightly less than 30%. This appears to be the case in 1970, even after allowing for the very sizeable increase in 'Social and Family Services' expenditures at the current account level.

This drop in the relative importance of capital expenditures can be attributed to 'Public Works' (the largest component in capital outlays)—still in 1970, \$2 million below the 1968 level, and to 'Sanitation and Waste Removal' (the second largest component)—some \$15 million below the 1968 level. This suggests increasing use of outside parties to perform certain services, rather than municipalities performing same directly

Such a switch in the basic method of providing general municipal services would diminish the relative importance of capital fund operations while at the same time increasing the relative role of current fund operations. Some evidence of this trend was to be seen in the analysis of current fund expenditures (See Page XV).

REVENUE FUND BALANCE SHEETS

The aggregate balance sheet for all municipalities changed between year ends 1969 and 1970 as follows

Assets rose by—	\$80.7 million
—'Cash and Investments' the 'net increase' in cash and near cash items, was.....	\$36.9 million
—'Taxes Receivable' were up.....	\$21.4 million
—'Accounts Receivable—Ontario' the 'net increase' in such items was	\$22.4 million

The rise in assets was made possible by—

Increased liabilities (borrowings)	
—'Local Boards and Other Funds', the 'net increase' in borrowings, chiefly from the capital fund.....	\$56.0 million
—'Accounts Payable—Other' the 'net increase' was.....	\$ 6.2 million
—'Other' payables, the 'net increase' was.....	\$ 4.1 million
Increases in	
Reserves	\$. 9.8 million
'Surplus	\$. 4.6 million

(For the sake of brevity in the above reconciliation, any 'net increase' in an asset means that the corresponding liability items have been offset or netted against the respective assets. This compaction has been possible because no material changes (at year end versus year beginning) were noted in offsetting items. The same approach was also possible for 'net increases' in liabilities)

In contrast to the aggregate reconciliation above, these variations in various municipal groupings appear

Metropolitan Toronto Area cash items represented \$38.4 million of the total \$46.7 million increase in assets

Ottawa-Carleton Regional Area: again the same pattern, with cash items accounting for \$8.9 million of a total \$11.4 million rise in assets

Niagara Regional Area: being in its first year of operation, the area presents a special case. The \$8.0 million drop in cash items would expectably be reversed in early 1971, upon receipt of \$9.4 million in taxes receivable, and \$6.2 million in government contributions

Cities, as a group, relied particularly heavily upon borrowings from the Capital Fund, to increase liquidity, to provide for higher Government receivables and to decrease certain liability items

All other municipalities presented a small \$4.1 million aggregate increase in liability items. Further, their cash position decreased by \$6.4 million. These two changes provided for a rise in taxes receivable (\$5.7 million) and higher government contribution receivables (\$5.8 million)

ANALYSES OF TAX ARREARS

Tax arrears are analysed by year, net of penalties and interest which are shown as a separate entity. This reflects the true arrears position of the receivables, unclouded by penalties and interest, the rates of which vary from municipality to municipality.

Total Arrears stood at \$132.2 million, up 20.7% from a year earlier. As the Total Tax Roll rose 10.5%, total arrears increased, in relative terms, to 9.0% of the roll. This is to be compared with 8.3% for the year earlier.

PLATE 'O' shows considerable variations exist as regards arrears related to tax rolls. This is, in part, due to variations in both billing and collection policies and procedures.

These variations are also implicit in the variations within TABLE VIII CURRENT COLLECTIONS AS A PERCENTAGE OF TOTAL TAX ROLL (Page XXV). It is to be noted, however, that the current collections as a percentage of the tax roll has dropped in all municipal groups in 1970 versus 1969.

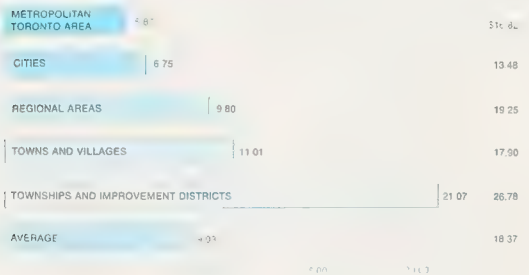

PLATE 'O' also shows Arrears Per Capita. The average of \$18.37 is up 19.4% from the figure of \$15.39. This widely-referred-to criterion can be influenced by a number of factors such as levels of taxation, the make-up of the tax paying base, unresolved legal actions, etc.

The commencement of operations of the Regional Municipality of Niagara, in 1970, poses some temporary distortion to not only the aggregate year end arrears picture, but to the indicators presented in PLATE 'O', and the latest results in Table VIII as well

PLATE 'O'

ANALYSIS OF ARREARS, YEAR END 1970

ARREARS AS A PERCENTAGE OF TOTAL TAX ROLL

Note: Ratios for each municipal group are shown on page XXXV

The ANALYSES OF ARREARS (See Page XXXV), includes certain pertinent revenue fund items. In particular it is to be noted that in 1970 revenue from 'Penalties and Interest on Taxes' totalled \$12.1 million. This exceeded the sum of the related expenditure items: Interest on Temporary borrowings, \$9.3 million, and 'Discount on Taxes', \$1.1 million. This was true for all municipal groups other than those within metropolitan and regional areas.

CAPITAL FUND BALANCE SHEETS

The current portion of the Capital Fund has already been discussed in the analysis of Capital Fund Operations, i.e., it was stated that the amount of capital outlay not permanently financed was reduced by \$29.1 million during 1970, to \$123 million at year end

'Capital Outlays To Be Recovered' amounted to \$2.1 billion at year end 1970. This represents the amount of capital outlays to be recouped in future years, whether it be from general municipal tax payers, municipal enterprises or other sources. To the extent that they are to be rated for or recovered in future years, transfers to municipal enterprises, loans for tile drainage, capitalized deficits, grants to universities, hospitals, etc. are included within 'Capital Outlays To Be Recovered'. As recovery is effected, the account balance is accordingly reduced

The last major segment of the Capital Fund is that concerning long term debt. As such obligations are dealt with under the discussion of Net Long Term Liabilities and Debt Charges, further comment at this point is not required

ANALYSES OF NET LONG TERM LIABILITIES AND DEBT CHARGES

'Net Long Term Liabilities' refers to the effective debt position of a local municipality. This term is to be distinguished from the nominal debt position indicated by the expression 'Long Term Liabilities'

'Long Term Liabilities' are adjusted to reflect debt obligations 'Assumed By' or 'From' other municipalities and to allow for the 'Total Value of Sinking Fund Requirements and O.W.R.C. Debt Retirement' in arriving at 'Net Long Term Liabilities'. (Sinking Fund Debentures require annual contributions to retire the issue, while repayment of O.W.R.C. issues are provided for by contributions to a debt retirement fund. As stated in the Introduction, starting in 1970, the total value of fund balances as well as actuarial requirements are deducted)

Net Long Term Liabilities for local municipalities stood at \$1,927.6 million at year end 1970. This figure includes \$326.4 million School Board Debt (See Page XXXVII, Volume 1 for details)

Removing such School Board Debt produces a net position of \$1,601.3 million. The Capital Fund Balance sheet indicates \$1,184.4 million was attributable to 'General Municipal Activities' and the balance, \$416.9 million accounted for by 'Municipal Enterprises'.

PLATE 'P' presents the changes in Net Long Term Liabilities during 1969 and 1970

PLATE P

RECONCILIATION OF CHANGE DURING 1969 AND 1970 NET LONG TERM LIABILITIES (\$ MILLION)

	1969	1970
Net Long Term Liabilities, January 1	\$1870.0	\$1829.4 ▲
Add: Debt issued (Including issues for school purposes borrowed by Metropolitan or Regional Municipalities)	191.8	232.1
Less: Principal Repayments (Including those for school purposes by Metropolitan or Regional Municipalities)	128.1	
Net Long Term Liabilities, December 31	\$1933.7 ▲	\$1927.6

▲ Reduced January 1, 1970, by \$41.7 million representing transference of school-purpose debt from certain municipalities within the Regional Area of Ottawa-Carleton to the Ottawa Board of Education

■ Revised January 1, 1970 Net Long Term Liabilities further reduced by \$62.6 million, representing purchases of own debentures by municipalities

For simplicity, the reduction in Net Long Term Liabilities is assumed to have occurred at the start of 1970. Such purchases would have taken place during the year

PLATE 'Q', left half, shows Net Long Term Liabilities for both municipalities and municipal enterprises as a percent of equalized assessment. In view of the comments made earlier in respect of equalized assessment, this base, rather than local assessment is preferred when comparing debt levels one municipality with another

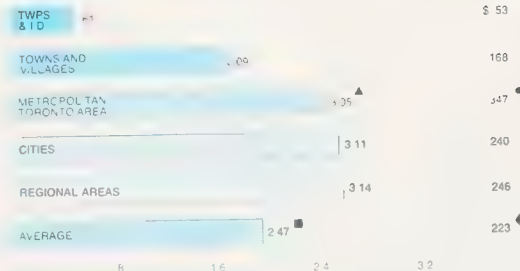

The data have been prepared to exclude the existence of school board debt in the Metropolitan Toronto Area. On average net long term liabilities accounted for 2.47% of equalized assessment at year end 1970 versus 2.78% the year end earlier. The decrease in this ratio was noted in all groups

Little change in the composition of net long term liabilities is noted at year end 1970 versus 1969. Debt allocated to general municipal activities increased from 73% to 74%

PLATE 'Q'

ANALYSIS OF DEBT, YEAR END 1970 DEBT AS A PERCENTAGE OF EQUALIZED ASSESSMENT

NET LONG TERM
DEBT
PER
CAPITA

Note: Excludes school board debt equal to

▲ 1.45%, ● \$164
■ 51%, ◆ \$ 45

PLATE 'Q', right half, shows net long term liabilities per capita. At year end 1970, average per capita debt was \$223. It must be noted that the per capita debt indicator must be used with care. It does not describe the nature of the underlying liabilities, i.e., from whom will it be recovered, over what period of time, involving what rate of interest? Nor does it allow for any 'Balance At End of Year Not Permanently Financed' as shown on the Statement of Source and Application of Capital Funds, which represents a further debt load in the offing

To help offset the deficiencies of this debt indicator, another criterion, 'Debt Charges as a Percent of Total Revenue' has been introduced. The Summary indicates that while the average is 13.0%, these factors range between 3.7% for Townships, and 18.4% for the Metropolitan Toronto Area. Here again, the adjustment for education debt produces revised ratios of 10.9% for all municipalities and 12.8% for the Metropolitan Toronto Area

All these debt burden indicators somewhat understate the case with regard to municipalities within county administrative units, as these factors exclude county debt

COUNTIES

County municipalities have the same reporting structure as those of local municipalities. The presentation format for counties is, therefore, as close as possible to that for other municipalities. Any differences are due to the different structure of counties and—to a lesser degree—to the difference in the nature of their activities.

The population of municipalities within county administrative units, at year end 1970 was 2,162,257. After adjusting for the creation of the Regional Municipality of Niagara, the growth of such population was very close but not quite equal to that of the province as a whole. This performance is in contrast to that in 1969, when the population of municipalities within county administrative units grew at only 1.7% versus 2.45% for the province as a whole.

The 'Provincial Equalized Taxable Assessment' figures are merely the addition of such figures for the constituent local municipalities, as shown elsewhere in the SUMMARY. These figures were not used by counties in their calculations, nor are such figures reported in counties' financial statements. Such Provincial Equalized Taxable Assessment was \$18.9 billion in 1970 versus \$16.9 billion in 1969. Such assessment in municipalities, within county administrative units, accounted for 29.2% of total equalized assessment in 1970.

PLATE 'R' provides a record for all counties' operations in 1969 and 1970. However the commentary following excludes the operations of the former counties of Lincoln and Welland in 1969.

Total Revenue in 1970, at \$99.0 million versus \$94.1 million, showed an increase of 5.2%. However, the taxation levy on Local municipalities, \$49.9 million as reported by counties, was up only 0.8%. Contributions from the Province, the other very important source of revenue, amounted to \$44.4 million, up 11.6% over the year earlier. 'Roadways' grants, at \$32.0 million maintained their position as the paramount transfer. The level of such grants was a little below recent experience (\$33.5 million in 1969 and \$32.6 million in 1968). Grants for 'Social and Family Services' at close to \$10.0 million were more than double the 1969 level, and accounted for the majority of the increase in transfers.

In 1970 grants paid to counties equaled 45% of the current and capital expenditures for general municipal activities. The ratio has ranged between 36.8% and 44.2% in the 1965-1969 period.

Expenditures on the current account totalled some \$98.8 million, up 6.2% over 1969. 'Social and Family Services' increased by \$7.5 million (56.9%) to the \$20.9 million level. 'Public Works', 'Conservation of Health' and 'Other' expenditure each showed absolute increases in the order of \$1.1 million. The \$5.0 million decrease in 'General Government', to the \$5.4 level, can be attributed in part to refinements in the reporting of expenditures by function.

PLATE 'R' SUMMARY STATEMENT OF REVENUE AND EXPENDITURE FOR COUNTIES (\$ MILLION)

	1969 *		1970	
REVENUE				
Taxation—Levy on Local Municipalities	\$52.0	52.5%	\$49.9	50.4%

Slight discrepancies due to rounding.

* Includes counties of Lincoln and Welland

For all reporting counties, revenues exceeded expenditures by \$0.2 million compared with \$1.1 million in 1969. In 1970, 21 counties together produced an aggregate surplus of \$1.4 million, with 5 accounting for nearly half thereof. Total deficits of \$1.2 million were very largely accounted for by six counties. Turning to Capital Fund Operations, 1970 capital expenditures totalled \$23.1 million versus \$20.7 million in 1969. While 'Public Works' remained the predominant type of expenditure, this function accounted for only a small portion of the increase. 'Social and Family Services' accounted for \$850,000 of the increase. All other expenditures increased by some \$1.4 million.

Transfers by counties, of capital funds received by them, to other entities totalled less than \$3.0 million. Such transfer activity is relatively less important at the county level than at the local municipality level.

Funds from various sources were used to finance capital expenditures and transfers to other entities etc. The Province, by providing \$10.4 million in grants, and by purchasing \$1.0 million in debentures accounted for 41% of all sources. Sales of long term debt issues to the public provided \$6.0 million. All other sources provided \$10.3 million.

A portion of funds, derived from the various sources discussed, provided for a decrease in the aggregate net deficit position of counties' capital funds during the year. This position fell from \$1.3 million to \$400,000. This latter figure represents a very small supplement to the \$39.7 long term debt outstanding at year end.

In relative terms, counties' aggregate net long term liabilities, at December 31, 1970 showed a modest increase from the year earlier. Thus on a per capita basis, such debt equated to \$18.34 per capita versus \$17.99 in 1969. Debt charges related to revenue produced the ratio of 6.12% in 1970 versus 5.89% in 1969.

CONCLUDING COMMENT

It is hoped that this publication extending as it does the growing body of meaningful data will provide important background information to all those interested in the field of municipal finance. The Department welcomes constructive criticisms of the presentation and suggestions for its improvement. Enquiries regarding the contents should be made to the Municipal Finance Branch—Reports Section, Department of Municipal Affairs, 801 Bay Street, Toronto.

printed and published by WILLIAM KINMOND, queen's printer and publisher

price \$5.00 per set (volumes 1 and 2)

INTRODUCTION

This is the second volume of the 1970 SUMMARY OF FINANCIAL REPORTS OF MUNICIPALITIES. The publication has been divided into two parts so that an accurate and meaningful review might be presented in a conveniently sized format.

A Tabular Summary precedes the data in this volume. The Commentary and complete Summary appear in Volume 1. The remainder of this Introduction is confined to certain modifications in reporting procedures and summarization techniques affecting data which follows herein.

CAPITAL FUND OPERATIONS

Formerly entitled 'Statements of Source and Application of Capital Funds', contains a few changes worth noting. Under Capital Financing, 'Long Term Liabilities Incurred' are now reported—less any discount, or, plus any premium—arising at time of issue. (Formerly discounts on debentures issued were treated as an item under 'Capital Outlays').

'Prepayment of Special Charges', a separate item in the 1970 edition, is now included within 'Other'. It is estimated that prepayments account for no more than 20% of the net total for all municipalities.

Under Capital Outlay, 'Transfers for Capital Purposes' no longer separately identifies 'Transfers To School Boards'. These are included within 'Other' transfers, and account for upwards of 85% of the total of this new item. This high percentage is due to transfers to a relatively few school boards as explained in the Commentary in Volume 1.

REVENUE FUND BALANCE SHEETS

Technical considerations have required that separate balance sheets for both the Revenue Fund and the Capital Fund continue to be presented rather than a single, consolidated format. It should also be noted that on both balance sheets, the item 'Temporary Loans' is synonymous with the previous 'Bank Overdraft and Temporary Loans'.

As per the approach adopted in respect of 1969 data, the often minor accounts receivable, 'Canada' and 'Municipalities' have been merged with the more sizeable 'Other' receivables, 'Accounts Payable' and 'Accrued Liabilities' have been compacted.

For comparability with the previous edition, the item 'Taxes Receivable' does not include 'Property Acquired for Taxes'. This is in contrast to 1970 financial reports of municipalities which include such items (net after allowance for loss on sale).

ANALYSES OF ARRIFARS

Continuing the format decided upon for 1969 data, 'Property Acquired for Taxes' is

shown on a 'gross' basis, i.e. before the deduction of any 'Allowance for Loss On Sale of Such Properties'. (1968 data was shown "net", that is, after the deduction of such allowances). The analyses have been expanded to show relevant items, from the 1970 Revenue and Expenditure Statements, which are, to a certain extent, indicators of financial management policies.

CAPITAL FUND BALANCE SHEETS

Current asset and current liability data are condensed into the same pattern as that adopted for the Revenue Fund Balance Sheet. This provides a more concise presentation of the liquid portion of capital funds. Further, 'Other' current asset and current liabilities items have been footnoted where they contain items of a noteworthy nature such as the liability item 'Unappropriated Capital Receipts'.

Starting with last year's issue, the non-liquid items 'Fixed Assets' and 'Equity In Fixed Assets' no longer appear. Fixed asset figures are not comparable between municipalities. Such figures could be the historical cost, nominal value, unpaid capital balance thereon, or a combination thereof. Thus the emphasis is now on the long term liability position.

Debt originally issued by municipalities for school purposes was assumed by the new School Boards, effective with their creation, January 1, 1969. (The exception being in the Metropolitan Toronto Area as noted in the tabular data). Accordingly the debt no longer appears on municipal balance sheets, since the School Boards have now assumed the liability for interest and capital repayment. However, the School Boards make these payments to the respective municipalities, which remain of course, legally responsible to the bondholders. Public and Secondary School Boards are now responsible for the issuance of their own debt.

ANALYSES OF NET LONG TERM LIABILITIES AND DEBT CHARGES

All education debts are included under the heading 'Incurred by the Municipality' but then removed under 'Assumed by Others' within the 'Reconciliation of Net Long Term Liabilities'. The exceptions to this statement are those discussed above, in the Metropolitan Toronto Area, and other relatively modest borrowings.

The item 'Less Total Value of Sinking Funds and O.W.R.C. Debt Retirement Fund', a deduction from gross debt in the reconciliation, now includes any fund balances over and above previously reported actuarial requirements. For all municipalities as a group, the increase in the deduction due to this change in reporting format is not thought to be material. However, in the case of any one municipality it could be moderately noticeable.
